

APKS AND BUNDLES IN ANDROID DEVELOPMENT

SIMILARITIES

- Both have functional code.
 - Both include the resources needed for the app to function on a device.
-

DIFFERENCES

Bundle

- AAB is a publishing format that allows developers to publish more efficient apps on Google Play Store.

APK

- APK is a type of file that may be installed and distributed on a variety of devices.
-

DIFFERENCES

Bundle

- Downloading Bundle takes less time.

APK

- The download speed is slower than that of Bundle.
-
